Add-ons

Regardless of the selected package, you can purchae these add-ons:

- **Archiving** - Stores emails for up to 10 years. It allows you to filter emails and export large batches of emails for disaster recovery and legal use cases. See *Email Archiving*.
- **Incident Response as a Service (IRaaS)** - Check Point expert analysts respond to all your end-user restore requests and phishing reports. See *Incident Response as a Service (IRaaS)*.
- **DMARC Management** - Supports the maintenance of a restrictive DMARC policy, ensuring you and your customers are protected from impersonation attacks and your business emails always reach their external destination. See *DMARC Management*.
- **Security Awareness Training (SAT)** - Educates employees to recognize and avoid cyber threats, reducing the risk of data breaches while enhancing organizational security and compliance. See *Security Awareness Training*.
- **SaaS Security Posture Management (SSPM)** - Configuration best practices for your Microsoft/Google environment and protection against compromised connected applications. See *SaaS Security Posture Management (SSPM)*.
