OFFICE HEALTH & SAFETY

JUNIPER MIST WIRED & WIRELESS

Reliable connectivity for when you need it most.

When Every Minute Matters…

Ensure the health and safety of workers and visitors with consistent Wi-Fi coverage, everywhere.

- Remotely initiate safety/security measures such as door locking, zone-based security procedures, occupancy monitoring, and emergency beacons
- Establish the reliability of security devices such as air quality monitors, chemical sensors, and security cameras
- Easily execute proximity contact tracing/hot zone alerts
- Quickly locate life-saving devices and key personnel with embedded vBLE

Wi-Fi Assurance

Wi-Fi Assurance offers proactive optimization of wireless performance and real-time insights that make certain your essential devices are operational in your most critical time of need.

- Set up and track key wireless criteria (pre- and post-connection metrics), such as time to connect, capacity, coverage, and throughput.
- Anomaly detection automatically captures packets for event correlation and builds network intelligence with radio resource management (RRM) at the client level.
- Network automation with APIs

RETAIL

REAL-TIME INDOOR LOCATION SERVICES

Help your customers do more with their Wi-Fi network

Enhance Customer Engagement

Give customers better control of their mobile journey and deliver rich, in-store experiences that drive increased revenues.

- Drive customer behavior with contextual offers
- Improve product placement based on patterns
- Help customers and employees find products on store floor

Gain Key Consumer Insights

With User Engagement and Asset Visibility, retailers receive critical datapoints to optimize operations throughout the store.

- Understand dwell times and monitor visits
- Optimize staffing resources to accommodate demand
- Trigger security cameras and other IoT devices based on user location

K-12

JUNIPER MIST WIRED & WIRELESS

Enhance the digital learning experience and more.

Empower Children

Seamlessly deliver digital learning across traditional, remote, or hybrid instructional models.

- Fast, reliable Wi-Fi connections that power your AI-driven digital learning network
- Simplified troubleshooting with self-driving capability
- Quickly locate FM Systems, missing Chromebooks, and the nearest life-saving equipment
- Spend less time troubleshooting and more time innovating to enhance the learning experiences

Safeguard School Environments

Protect against ever-evolving cybersecurity threats and keep students healthy and safe.

- Deliver updates to the network in minutes with agile microservices cloud
- More effective cyber threat protection
- Initiate safety/security lockdown and emergency beacons
- Trigger HVAC, security cameras and other IoT devices based on user location
- Improve student/staff communications

HIGHER ED

REAL-TIME INDOOR LOCATION SERVICES

Enhance the campus experience and more

Streamline Campus Familiarity

Deliver highly accurate on-campus wayfinding and push notifications via mobile engagement.

- Student wayfinding navigation (point A-B, study rooms)
- Share location information with colleagues, family and friends
- Asset tracking (Bluetooth tagging) for AV materials, etc.
- Make it easier for guest speakers and visitors to fully appreciate campus amenities

Gain Key AI-Driven Insights

Insight into student traffic patterns helps you manage network resource planning and campus safety.

- Visitor segmentation and trends with dynamic categorizations
- Initiate safety/security lockdown and emergency beacons
- Trigger HVAC, security cameras and other IoT devices based on user location

ENTERPRISE

REAL-TIME INDOOR LOCATION SERVICES

Wayfinding, asset management, occupancy and proximity tracing

Enhance Engagement and Visibility

Improve workforce user experience with real-time indoor location services.

- Easily direct employees to available resources such as meeting rooms
- Share location information with colleagues, family and friends
- Drive employee behavior with contextual notifications

Gain Key AI-Driven Insights

Insight into workforce traffic patterns and visitor traffic flows helps you manage network resource planning and workplace safety.

- Simplify operations and scale with ease
- Trigger HVAC, security cameras and other IoT devices based on user location
- Maximize real-estate usage

HOSPITALITY

REAL-TIME INDOOR LOCATION SERVICES

Elevate the guest experience in a variety of ways

Provide Guests an Ideal Stay

Deliver personalized guest experiences that drive increased revenues.

- Rich wayfinding empowers guests to locate and navigate to on-site amenities and points of interest
- Deliver personalized messages, and contextual offerings based on a guest's location
- Provide a virtual concierge and enable a "What's Nearby?" feature to locate onsite offerings and events

AI-driven Insights

Drive down deployment costs and improve the accuracy of real-time indoor locations services.

- Unique visitor trends and preferences with popular motion flows
- Trigger HVAC, security cameras and other IoT devices based on user location
- Initiate safety/security lockdown and emergency beacons
- Maximize real-estate usage
